Watersoluble paper

Our watersoluble paper is the representative patented product in our specialty paper series. It dissolves quickly in both cold and hot water. It has been used for the pin hole detection at the welded part of a fuel tank in the Apollo Plan by NASA of the United States. The products consist of a standard type and other special types which are specially prepared for heat-sealing, higher tear-strength and dissolving in alkali.

Water-Soluble Paper Label

Our Water-Soluble Label Stock, the first marketed in the world, is used for beer keg labels etc., as the labels can be washed off without damaging any surfaces. Application for returnable containers or material recycling system is now very much demand worthy as "Ecology Friendly" Label Stock.
